Business Class Hosting packages

Standard Business Class Hosting - $30/month
Solid, basic hosting. A great choice if you plan to make little to no changes to the site on a regular basis.
- Includes 99% uptime
- Regular backups of your website
- Standard configuration (works with email exchange setup)
- *NEW – Includes an SSL certificate showing your site as secure ($100 value annually)*
- Does NOT include email hosting

Deluxe Business Class Hosting - $75/month
Our most popular option, Deluxe, keeps your Wordpress or CMS up to date and as secure as possible. This option also gives you priority service on changes you may need. Many clients request changes that fall outside the administrative CMS capability, or may ask for a refresher on training. This package comes with an hour each month to help you budget your support dollars.

- Includes all features of Standard Business Class Hosting
- Up to 1 hour each month for site modifications, training, or troubleshooting
- Monthly updates to all plugins and Wordpress version

Premium Business Class Hosting - $100/month
Despite utilizing best security practices, occasionally a site can get hacked, and if your site is mission critical to your business, then the Premium hosting is for you. Think of it as insurance if that catastrophe hits your site. You move to the front of the line while we get your site back up and operational as quickly as possible, often in as little as 24 hours.
- Includes all features of Deluxe Business Class hosting
- Ultimate hack proof guarantee (means if despite best security practices your site is hacked, we perform all work necessary to restore your site and get you back up and running)

Our Business Class Hosting packages **do NOT include email**. Please contact us for a custom quote on email packages to suit your needs.

Monthly accounts are paid through auto draft via credit card or paypal. To pay by check/invoice, please pay quarterly or annually.

** All plans now include semi-annual (at minimum) update of the Wordpress CMS and all plug-ins to make sure all are compatible. We also run a security audit at the same time.
